The Day.

To-day Commissioners from a number States meet at Washington for the purpos of seeing if any adjustment of the diffleui es between the sections is possible. Thousands in all parts of the count look to this conference full of hope and confident of favorable results. Iudeed, 1 nay be regarded as the last hope of eve the most sanguine of the friends of the Union. No one hopes for any action from Congress that wlii restore the Union and give peace to the country. No one in the South hopes for anything from the Northern Legislatures. Many do hope for much from the Commissioners at Washington.
We shall rejoice if these hopes of the attiotle friends of the Constitution and the Union be realized. If we could see ny reasonable hope ourself, we would risk the chilling effects of a future disappoint ni, by assuring our readers of the fact. We see but little reason to hope for such

results as all wish may flow from the Conference. Yet, while preparing for the vorst, we should hope for the best. The meeting of the Conference is an im portant event; and the proceedings of that body of distinguished men will be looked or with much interest.

In Montgomery, Alabama, will be assem-

led to-day, also, a body of nien whose action will be most important. Deputies from the States of South Caro ina, Georgia, Alabama, Mississippi, Louisiana and Florida will meet in Convention, in the last named city, to-day at 10 o'clock for the purpose of forming a SOUTHERN CONFEDERACY and establishing a Provi-

sional Government for it. The Deputies appointed to this Conven ion subrace the ablest men and most profound statesmen in these Republics, equal in number to the Senators and Representa ives they were entitled to in the Cougress Tthe United States.

Meeting with a fixed purpose, and great nanimity of sentiment, their action may be easily predicted.

They will form a Southern Confederacy consisting of the States we have named, acthe basis of the old Federal Constituion; they will establish a Government for such t onfederacy; they will elect a President, Vice President, and other officers therefor; they will make provisions for a tuture and permanent Union to include ail the States that may hereafter secode from the existing Confederacy; and when they adjourn, a SOUTHERN CONFEDERACY will be a fixed fact, and its existence and independence will be speedily acknowledged by all the powers of the world.

Mr. Hannison's peace resolutions were taken up and debated by Mr. Cleant, Mr HARRISON, and Mr. BUCKNEH, after which the House went into Committee of the Whole on the state of the Commonwealth. When Mr. HARRISON'S resolutions were taken up, Dr. Abell, of Mercer, offered a ubstitute, being the resolutions presented ome time since by Mr. CLEARY, of Horr on, as an original proposition.

I have visited "Old Westminster Abboy," where lie buried all England's defunct royalty; and also her great poets, painters, and warriors. Byron, their sweetest lard, is dealed a reeting place here, to the shame of the Bovernment. I attended service in this fine old monument of past ages, and it was grand. The echo of the organithrough the lufty stone arches seemed as lift would never die away, and the solemn responses from the hundred voices of the choir was the most impressive music I ever listened to. A visitor to London should never fail to attend service at Westminster. St. Pauls deserves notice, but I cannot speak of all the wonders in one letter.

The Thunes swarms with little cumbins steamers, which stop at all the streets, and carry you anywhere in London for a jouny. The weather here, so far as my experience and research goes, may, for the year, be set down, as nine months of rain, and three months very wet. Editors Louisville Courier: "A happy new year to you, and many returns." When last I wrote to you, I was in Liverpool, that great shipping port of the world. When I had completed my labors there, I took the "Great Northwestern Rallroad" for London. Railroads in England are a nuisance, and they might borrow some ideas from "Brother Jonathan" which would add much to the convenience and safety of the public. The cars are about the size and construction of two old-fash-ioned stage coaches attached together, and are separated into compartments, seating about eight persons. You enter at the side of the ear, and the "guard" bocks you in your cell. There is no method of communicating with the guard or your fellow-prisoners except at the stations; no connection-rope through the train to give an alarm in case of accident, and cases frequently occur of a car taking fire from the sparks, and the poor limites have the choice of rossting or breaking ont and impuring from the train to give an entire from the sparks, and the poor limites have the choice of rossting or breaking ont and impuring from the train to give an entire from the sparks, and the poor limites have the Jerome Bonaparte, Ex King of Westphalla, and uncle of the Emperor Napoleon, and her son by her marriage with the Prince, elsim to inherit their part of the personal property left by the Prince. Madame Bo-naparte, who is now in Paris, was, it is well known, an American lady, named Patterson, and the real object of the present suit is to re-establish the perfect legality of her mar-riage. The cars, having hut four wheels ander them, are very misteady, and such a thing as a stove in them is unknown. Sleeping cars are not required, as you can go the length of this country by day light. The fare is about double what it is in the United States, as is also the discomfort. Your baggage le carefully weighed, and for all over skity pounds you pay enormously. They use no baggage checks, but paste a card of destination on each parcel. So much for railroad traveling in England

London is a wonderful city, a world in itsel. I have expended all my apare time, for a menth past, in looking at some of the wonders to be seen here, but it will take a year to see them all. The relies of an tiquity contained in the "British Museum" would alone afford study for a month. Massive obelisks, tomhs, and statues, that seem to be almost immovable from their ponderous weight, have leen brought from Pompeli, Neneveh, and from the Pyramids, and deposited here. Munmies of Egyptian Kings, still in their Strephages, lie on every side. Relies of the old Romanage, of gold, silver, expepr, and glass, which have been due from the soil of "Old England," with all species of warlke armor, and weapons, are kept here. The building itself is worthy of notice. It covers about eight acree of ground, and is fire stories high. It also, ontains the Library—a grand collection of old manuscripts, books, &c. Here I saw the original "Magna Chartar" of King John, antograph letters of all the Kings and Queeus, and among them, what cansed a thrill of pleasure to dance through my "Yankee" breast, original letters of Washingtou and Frankin. We are amazed at the polley of the lead ers in the anti-Convention movement in Kentucky, as foreshadowed in recent speeches at the capital of the State-a poll cy which, if successful, would sweep away at once and forever every right and every security of person and property which our Government was instituted to protect.

That policy looks to the establishment of the principle, that If slave property be jeopardized from any cause, none but slave-holders shall be subjected to expense or put to trouble or placed in danger to proteet it; that if the rights of land owners be attacked, none but land owners shall be taxed or troubled to maintain them; that If it be attempted to limit the right of suffrage to those only who can read and write, none but those who cannot read and write shall be expected, or will be expected. to prose it, if it may lead to any unpleasant consequences: for the same principle applies in all cases.

It is not more unreasonable now to supnose, that in ten years a Northern majority will demand a further restriction of the right of suffrage in the Slave States, or at least in the common territories of the United States, than it was at the date of the formation of the Federal Government to suppose that the time would come when it would be sought to destroy the great and ntrolling interest of half the States of the Union. The assumption that slavery has brought our country to its present distracted condition is unwarranted and untrue. Slavery has never brought trouble of

the country; slavery has not devided the I'nion; slavery will not cause civil war. The trouble comes, not from slavery but from the attacks of lanstical men on the rights of the slaveholder.

Should the Legislature of Kentucky solemnly enact that no man who has no a freehold worth one thousand dollars shall be entitled to vote at any election in the Commonwealth, an attempt to carry the law into effect would produce contention, strife, and revolution. What would be thought of the man who would attrl bute the difficulties thus originating to the right of suffrege, and not to the unwar-rantable invasion of that right? He is just as far wrong who attributes our pending difficulties to the existence of slavery, and not to the unjustifiable and persistent and pneonatitutional warfare of the North

on slavery. A great crisis is upon us. Serious and threatening questions have to be met and decided at ouce. Troubles cannot be avoided, and greater calamities than we like to contemplate may yet await us. And party leaders-polilleans who are ready and willing to sacri-flee the material interests of the Commonwealth, and the liberties of the people, for party ends-iu such a crl-le seck 10 array oue portion of the people of Kentucky against another, not because that other ortlon have been guilty of any wrong, but ecause they own property against which Seward and Lincoln choose from the worst of motives to wage an irrepressible con.

When the public safety, the interests of all, and the rights of all require that the people of Kentucky should be united as e man, there are men in our midst who seek by artful appeals and insimuations and assumptions to divide us one against the other, to fan the flames of faction, and thus to enable the enemies of us all to de-stroy the rights and privileges of sli through our own feuds and divisions!

But these men, whose conduct cannot be properly characterized by any language al our command, seek to avoid responsi sility by asserting as a fact what they do not undertake to justify. They say not that non-slaveholders ought not to make common cause with slaveholders against an attack that threatens the property of one class and the liberties of all, but that they will not join in protecting the konnr and

maintaining the rights of their State! Who are they who thus undertake to speak for the non-slaveholders? Who are they who thus impugu the loyalty of a whole class of the people of this Com-monwealth? Who are they who thus falsify history and basely calumniate their Figure common Co fellow citizens in order to strengthen the

THE events of the just refore us will be raught with a greater interest to the people of he whole country than those of the excling eriod through which we have 'usi partial-as brilling in their nature and as important in beir results as they have been. For the fire ime in the history of o r country a policical party, purely and slt 1 pre' one', has ano reded in electing the Chief Executive officer f the nation, and thus o tained control of one epartment of the Federal Corrame . Many fear it will be the last Congress of the United States of North America. At any rate, the next session of that body will be one of great interest and ts proceedings will be watched with much anxiy. Full telegraphic reports and other reliainformation will be laid promptly before the caders of the Louisville Courses.

During the Next Year, ABRAHAM LANCOLY will be inaugurated President of the United States, or of a portion of them, and a new polley will control the country. In the event of a secession of a portion of the Southern States, t may be that those who opposed the war with Mexico, and would have "welcomed our galhat soldiers with bloody hands to hospitable graves," will attempt to drive them back at the point of the bayonet. Saturday, the 2d Inst., was Candlemas day, as well as the ground-hog advent; and the ing cloudy and rainy, whiter may be considered broken, if the following couplet is a snre token:

If Candlemas day be clear and brigh, Then winter has another flight— If Candlemas day brings clouds and rain, Then winter has gone and will not return again. Then winter has gone and will not return again.

At Cincinnati, as we learn by the officers of the mailtoeat, the river is slowly rising, under the influence of the rains in that locality, which have much swollen the tributaries, including the Miami.

OFFICE LOUISVILLE COURIER, a SATURDAY EVEN'G, Feb. 2, 1861. In financial circles there is a further improvement to note, and in all cases where satisfactely paper was offered but little if any trouble was experienced in negotiating loans. The demand is rapidly decreasing, while, on the other hand, the supply of capital is increasing. Collections are being now freely made, so that paper matnring is promptly met, and confidence among business men is fast becoming restored, and, upon the whole, everything looks bright. Among business men we note a more cheerful appearance, and they seem more willing to make contracts than for some time past. There is no change to note in currency or exchange.

and they seem more willing to make contracts than for some time past. There is no change to note in currency or exchange.

To-day the general market was rather dull, owing to the fact that the railroads south of Nashville have become blockaded by the heavy amounts of freight that have been shipped in that direction by the merchants of our city in filling their Southern orders. The demand for produce and provisions has come almost entirely from the South, and now, that it is impossible to ship in certain directions, the demand from the places on these roads has ceased, as parties are not disposed to order now, when the goods cannot be received for some time. In flour there is a declicing tendency in prices, owing to the uniavonable news received from New York, but no permanent decline was established. The sales were about 600 bbls at \$4 50@\$5 50 for superfine to extra. The demand at present is almost entirely for superfine. The market for wheat is active, and that which finds its way to our market meets with ready sale at \$5c@\$1 10 for prime red to extra choice white. The demand for corn was rather small to-day and the sales were limited to 3,000 bushels at \$16,35e for mixed to prime white shelled, delivered at the depot. Outs are quict and unchanged. Whisky remains steady at 146 144. Groceries are firm and quiet. The provision market was rather weak, with no disposition on the part of buyers to operate at the current quotations, while, on the other hand, holders were firm at the present quotations. Buyers were contending for a decline, but holders were involved a still inrther decline in the prison market are this price. The demand for bacou was moderate at 71, 10, 105, and 11c for shoulders, rith, clear rib, and clear sides. In bulk means and lard there is no change to note.

New Orleans Money Markel.

[From the Crescent of the 21st.]

The general money markel mored along spretly to-day. There was no press for discountable of the commerce are trade. The general routine of commerce are trade. The general routine of trade is settling down on what we have beginned to consiliative a cash level, we have to say that cash level. To remove any doubts about what consiliative a cash level, we have to say that cash level; a dead level, and the dead level movement, as it were, is placing our commercial consumity in an independent position. That holders and owners of money cap prair away as much as they dosire, yet if there are as commercial or other securities aliquid they would be hore of commercial. As the course of things is now tending, it is palpable that the dealers and huyers of paper, who have for things is now tending, it is palpable that the dealers and huyers of paper, who have for the hore we often money and paper market, will leave on the commercial and controlled the New Orleans money and paper market, will have do now the second of the competition of the controlled the New Orleans money and paper market, will late, dealers in paper, owners of money, and those who have been living on eent per cut, that the borrowing and accepting system market, will have a check from which it will not convert the sear, 1851; that there are very limited factors accountance on the market; that the gone; that there are no twelve months cofficing accommend that the dealers in and buyers of paper have driven the cotton factorage community in the what may be termed a celf denying position, on which we might dilate.

Provisions at Cincipnatt. Provisions at Cancinnati.

The Gazette, of this morning, says:
Provisions, which received a damper yester day from the South, had a more dragging trade than other articles of produce, the navices today being calculated to further depress rate than attengthen matters. In the way of sakes we have but little to report. Holders keep their stocks back, preferring not to press sales, or even appear anxious to realize under present circumstances, but at the same time the offerings are in excess of the demand. Mess pork was to be had at \$17 for city and \$16.75 for long are in excess of the demand. Mess pork was to be had at \$17 for city and \$16.75 for country. For bulk meat the asking prices were 6½.28% of or shoulders and sides, with small sales of contry at 6½.02% f. Mr. PHELPS offered a substitute that the third section of the act of June, 1880, providing for the redemption of the Treasury notes, be modified so as to empower the Secretary of the Treasury to negotiate the balance of the loan not taken under that act, on the most favorable terms, instead of restricting the negotiation of the loan at not less than par, and after notice of ten instead of thirty days. Mr. Pholps said the Morrill tariff bill proposed a loan of \$21,000,000, and the bill reported from the Committee on Ways and Means \$25,000,000, thus making \$46,000,000, when there is an exhausted loan of \$14,000,000, under the act of June, of which he desired the Government to avail itself without unnecessary delay.

Mr. SHERMAN approved the anendment. The loan proposed was \$25,000,000. Ile supposed it would settle up the accounts of this Administration. As there was no money and little revenue, they would be obliged to resort to the credit of the Government.

Mr. RINDMAN offered the proviso that no part of the loan should be used to maintain forces to make was on States which Massachusetts Legislature. Boston, Feb. 2.—The Home went into secret session to-day to consider the bill appropriating \$100,000 to the emergency funds.
